

ZSCV011 AI and Online Cyber Safety Skills 1-Day Beginner Course (Non-Award)

DESCRIPTION

This accessible one-day Saturday workshop equips NT community members with essential AI literacy and personal cybersecurity skills.

Designed -for parents, families and individuals seeking to improve their digital wellbeing, it covers how to make the most of AI tools (ChatGPT, Gemini, Copilot), while also developing resilience against the associated cyber security risks: privacy breaches, online scams, inauthentic online content and deepfake technology. Participants will also learn essential electronic device protection, password security, and safe family technology practices.

The course balances innovation opportunities with building practical online security awareness and skills, empowering participants to access AI tools safely, whilst protecting themselves and their families online.

Learning Focus:

AI basics for everyday use
Online safety & data privacy for families
Cybersecurity for home users
Identifying AI data security risks, scams & manipulated online content.
