CRITICAL THINKING AND PROBLEM SOLVING

A 1 day course developed by the Australian Institute of Management and facilitated by Charles Darwin University.

This course provides you with the skills you need to solve problems efficiently and make decisions that are aligned to business goals. The course considers a range of models and techniques and provides practical guidance on how to implement them in your workplace.

This course is right for you:

If you want to become more adept at making decisions and solving everyday problems.

Your employer will benefit because:

You will have proven tools and techniques for identifying and responding to decision points and challenges in a structured and considered manner.

Learning Outcomes:

- Make the connection between problem solving and decision making
- Apply decision making processes
- Define problems and explore solutions
- Utilise the attributes of an effective decision maker
- Make ethical decisions
- Understand decision making styles and techniques
