Are you 'PrimaryConnections Ready'?

Would you like to participate in twelve hours/ two days of primary science and literacy professional learning in an award winning, Australian Government supported program?

The 'PrimaryConnections

Ready' program recognises that the beginning teacher has a myriad of professional responsibilities to deal with, and feeling confident, competent and ready to engage and work with their students in the important core learning area of science will be a significant advantage in that crucial first year of teaching.

Registrations now open

**University of Adelaide,
Adelaide**

Fri 2 & Sat 3 June 2017,
8.30am – 4pm (both days)

Being ready to apply the knowledge and skills learnt through this professional learning program will be a valuable asset from the new teacher's very first day!

*The course including course material is provided for free. The \$20 registration fee secures your spot and subsidises the cost of lunch provided on both days of the workshop.

PrimaryConnections Professional Learning presents

FREE* Pre-Service Teacher workshop: 'PrimaryConnections Ready'

"Not only did the workshop help with the science side of teaching, majorly improving my confidence, but also gave tools that can be used in other learning areas and in the classroom."

– **Student**, University of Notre Dame, Fremantle WA

"Science is too often left out of the classroom because it is too 'hard'. PrimaryConnections makes planning science very straight forward and the workshop explains it so well. The workshop today was so helpful and will be extremely useful in the classroom." – **Student**, University of New England, Armidale NSW

First preference will go to final year students

About the two-day 'PrimaryConnections Ready' Pre-Service Teacher Program

The twelve-hour 'PrimaryConnections Ready' program assists pre-service teachers to learn about, understand and clarify:

- The aims of the PrimaryConnections program
- The major principles and pedagogy of PrimaryConnections
- The power of the PrimaryConnections 5Es teaching and learning model
- The important relationship between science and literacy
- The "How-to tools" that enhance student learning in science and literacy
- How the program is based on current research
- The richness of the exemplary PrimaryConnections curriculum units and other resources.

"These workshops provide insight in regards to teaching and implementing science that has been more meaningful than science taught at university." – **Student**, Charles Sturt University, Albury NSW

*The course including course material is provided for free. The \$20 registration fee secures your spot and subsidises the cost of lunch provided on both days of the workshop.

About PrimaryConnections: Linking science with literacy

PrimaryConnections Linking science with literacy is an innovative approach to teaching and learning which aims to enhance primary school teachers' confidence and competence for teaching science.

An award-winning program of the Australian Academy of Science supported by the Australian Government Department of Education, PrimaryConnections focuses on developing students' knowledge, understanding and skills in both science and literacy.

PrimaryConnections key features:

- An inquiry and investigative approach
- A comprehensive professional learning program
- Award winning curriculum resources linking science with literacy
- An ongoing research and evaluation program.
