INTERNATIONAL EDUCATION:
INCREASING THE TERRITORY’S INTERNATIONAL EDUCATION PROFILE
Schedule 3.6

Issues
The parties agree the key issues to be addressed are:

- Use education services as the foundation to develop trade and diplomatic linkages between the Northern Territory and other countries,
- Increase the number of international students in Territory schools,
- Increase the number of international students studying in NT Schools to enrol and complete their post secondary education at NTU,
- Build the NT’s capacity to host international short courses and study tours,
- The University needs to have 800 – 1000 students for a viable international program,
- Building benefits from the partnership with ANU.

Strategies
The parties agree the strategies they will employ are:

- Establish a cross-agency working party with membership drawn from NTU (International Student Division), DEET (International Division), NTTC and DBIRD;
- Establish a coordinated approach to international marketing and student support for overseas students similar to the Team Canberra consortium;
- Share information on international education issues and, where possible, develop a common approach to changes in relevant legislation and government policies;
- Liaise with industry to deliver training and technology transfer as a joint program through the University and Government.

Performance Indicators
The parties agree the indicators to be used are:

- Increase numbers of international students studying in NT Schools and NTU.
- Increased articulation of international NT secondary school students attending the University.
- Cooperative marketing strategy developed by June 2003.
- Joint risk management strategy by June 2003.
- Increased TESL capacity within the NT Education sector.
- Number of new jointly developed educational products and marketing material for international students, and
- Off-shore training programs delivered by the University linked to Government sponsored programs.
