

Love What You Do

MyCareerMatch

Matching a student's personality
style to careers they would love.

ICOOOL!

Your Personality Style Is:

Analysers are thinkers, well-organised, precise... but before you discover all the great things about yourself and the careers you'd be fantastic at - here's some information about the different personality styles. It will help you understand why you're an Analyser and why your best friend could be something else.

The Four Personality Styles

MyCareerMatch uses four style identifiers, (D) DRIVER, (P) PROMOTER, (S) SUPPORTER and (A) ANALYSER.

When blended together in varying percentages, these four personality styles make us who we are. There's no right or wrong style and one style is not better than another. What's important is what you do with your talents, your skills, your education and how you get along with others.

Driver

Drivers are Adventurers

Strong willed and practical. They like action and results. Drivers want to lead, be the boss and win every challenge.

Promoter

Promoters are Socialisers

Outgoing, fun and charming. They are great communicators who inspire others with their imagination.

Supporter

Supporters are Helpers

Kind, dependable and practical. They are easy to get along with and enjoy helping people.

Analyser

Analysers are Thinkers

Great with facts and numbers. They are well-organised, strive for accuracy and like to pay attention to details.

Understanding Your Personality Graph

This graph indicates how strongly each style influences your personality. The highest is your Dominant style. This is the one that governs how you behave most of the time. The second highest is your Backup style. It's like your co-pilot and kicks in when there's a need for balance and sound decision making. When styles are of equal percentage the order to determine your style is D, P, S then A.

One of the most rewarding journeys you'll take in life is the path of self-discovery. Understanding who you are and what you're good at - will help you achieve a happy and successful life. Enjoy the journey.

|PERSONALITY

The personality section has content about you to use in your resume, personal statement or other applications where you are asked to write about yourself.

Your **Analyser** Style

Analysers are well-organised people who like to think about things carefully before deciding what to do. You have a curious mind that leads you to be organised and inventive. You like to follow rules and do things in a logical and correct way.

You don't get too emotional, and you'd rather deal with facts and numbers than with people. You don't mind being around people, but you don't have to have them around you all the time. You like to be by yourself, to read and discover new things. You are creative and something of an inventor. Your talent to think things through makes you great at solving problems. It also lets you come up with new ideas. You stick with something until you are an expert at it. You expect the very best from yourself, and this can be tough because you always want things to be perfect. Some people think this is a weakness, but it makes you who you are.

You want things to be right, you want them in the right place and done the right way. These are your strengths, and there are many opportunities for you to use these talents :)

Words That Describe You

**Logical • Thorough • Serious • Cautious • Determined • Correct • Careful
Creative • Curious • Organised • Accurate • High Standards • Questioning
Respects Rules**

Things You Like

- Think and plan ahead
- Do things you know you're good at
- Have clear directions so you don't make mistakes
- Do things step-by-step
- Be organised and prepared

What You're Good At

- Working carefully
- Following rules
- Solving problems
- Organising material
- Thinking logically

What We Admire About You

- You like to know how things work
- You always try to do your best
- You like things to be organised
- You do things correctly and logically
- You think about things before deciding
- You enjoy spending time by yourself
- You like things to be done just right
- You are curious and creative

How You Make A Difference

Being Realistic

You are a logical person and make a difference by not getting emotionally caught up in the problem. By making realistic plans and decisions based on facts and data, you reduce conflict and stress.

Keeping Things Simple

You make a difference by making the difficult seem easy. Your skill is to keep things simple by identifying the steps needed to implement a plan. It's a great talent to have!

Gathering Information

Your strengths in gathering and collating information make a difference by enabling you to produce factual material such as manuals and text books and enabling you to store information so that it can be accessed efficiently.

Finding Mistakes

You are good at finding mistakes and preventing problems before they happen. You double-check your work and that of others. This often leads to uncovering mistakes and seeing problems before they occur. You make a difference by your thoroughness, eye for detail and research.

...And More!

Being Responsible

You can be counted on and do what you say you will do. You are reliable. You make a difference by being dependable and carrying out your tasks diligently.

Working Logically

You generally tend to work through problems and tasks one step at a time. You work logically and encourage slow but steady progress. You make a difference by being orderly and systematic.

Meeting Deadlines

You are realistic and strive for results such as getting things done on time, or saving money or figuring out how to be more productive. You want to see tasks completed efficiently. You make a difference by ensuring that things are done correctly and deadlines are met.

Respecting Rules

You respect authority and are willing to use your authority with a sense of fairness. You understand that rules are meant to be followed because they create order and a method by which things get done. You make a difference by sticking to procedures and systems

Analyser Self-Improvement Tips :)

1. Lighten up and don't take everything seriously
2. Set more realistic expectations of yourself and others
3. Don't retreat into your shell, communicate about how you feel
4. Accept that people will change their minds
5. Look at the big picture and not just at the details
6. Reduce the pressure you put on yourself to perform at the highest level all the time
7. Respect people for who they are, not just for what they know
8. Don't take all criticism personally. View it as experience you learn from.
9. Try not to take too long when making decisions
10. We all mistakes so don't beat up on yourself

🎯 Your Strength Can Also Be Your Weakness

You've figured out that some people are like you and others are not. People are different. This doesn't make them better or worse than you, just different. Some people like action movies and others like comedy. Personal preferences determine your choice of music, clothes, hairstyle and friends.

How well you get along with others is a major factor in how successful you will be in your job and in the relationship you have with friends, partners, parents and teachers.

We each have personality behaviours that make us good at what we do but there are also behaviours that can make us look bad, annoy other people or get us into trouble.

As an Analyser personality you are great with facts and figures, well organised and disciplined. Your attention to detail, your logical approach and your high standards are great strengths to have and are admired. But your strengths can become your weakness if you over use them. For example; being orderly can be seen as being compulsive, logical can equate to being critical, being intense and quiet as being unsocial, being precise as being too picky, and being careful as being slow and perfectionist. Generally Analyser weaknesses result from being too cautious and careful, sometimes too moody and negative, often a result of caring more about tasks than people. You do set high standards for yourself and that's what makes you valuable but can also make you annoying to people who don't match your expectations.

People will always admire and want the things that make you an Analyser but be aware that there's an opposite side to your personality style that can annoy others and even stop your career advancement.

For you to succeed and have a rewarding career you must use your strengths to develop skills that will help you to achieve your goals and dreams. Try to focus on the areas you are best at, most passionate about, and where your strengths allow you to perform at your highest level. That is how top achievers become successful in their careers and in life.

Now you know how awesome your natural strengths and talents are - it's time to match your personality style to careers you would love!

| CAREER

We acknowledge the kind permission of the Australian Government Department of Employment for access to Job Outlook. Job Outlook contains a wide range of career information and recent labour market research on around 350 individual occupation.

Careers

Your strong organisational skills, accuracy and eye for detail make you a perfect match for careers that require following procedures, checking things and keeping records. You thrive on technical, task-oriented work. Your logical mind will thrive on the attention to detail and precision. You have excellent focus and you approach tasks with thoughtfulness and precision. Your strengths lie in gathering and collating data, researching and producing factual information. You enjoy asking questions and taking the time to find the answers.

Your Ideal Job Environment

Analysers are best when they:

- Have time to think
- Can work without being rushed
- Do technical and analytical work
- Can work on their own
- Are expected to do their best

Your Work Related Strengths

- Accuracy and attention to details
- Basing your decisions on facts not opinions
- Being able to follow rules and regulations
- Setting high standards for yourself
- Being careful and doing things the right way
- Being organised and prepared

It's important to understand the suggested jobs in your Top7 are based on current best prospects in each industry. When considering a career investigate the employment opportunities as they vary depending on economic circumstances and demand. Visit [Australian Jobs](#) to learn more.

1 Computer Science

Science and technology work hand in hand to achieve new breakthroughs every day. Together they've ushered in the new digital era and revolutionized the way we live and interact with each other. Jobs in computer science are fascinating and your personality is the perfect match to help shape the future.

Top Jobs For You In Computer Science

Great Attitude • Problem-Solving • **Persistence**
 Communication Skills • **Knowledge Seeker**

Career Personality Map

How To Interpret Your Career Personality Map

The Map is divided into the four MyCareerMatch styles, DRIVER | PROMOTER | SUPPORTER | ANALYSER and combinations of each style (DA, DP, DS etc.). Your style is shown as "YOU ARE HERE". The outer circle represents what you focus on and how you approach life. Drivers and Analysers focus on facts and figures, Promoters and Supporters focus on people and relationships. The middle circle represents what's important to you - for Drivers it's results for Promoters it's enthusiasm for Supporters it's sincerity and for Analysers, quality. The inner circle shows examples of careers that match your strengths.

Future Jobs

Preparing Students For Jobs That Don't Exist Yet

We want to share with you the current thinking on jobs of the future and skills that will be in demand in the next 20 years. Whilst we can't tell you what these jobs are or which ones will disappear, we can look at the trends and see the direction of employment and career opportunity.

One of the easiest ways to begin thinking about future careers is to focus on what may be a problem in the future and invent a job that will solve it. For example, if cars are to be autonomous (drive themselves) we will need the services of Smart Car Interior Designers who redesign what the inside of these cars will look like.

Those educated are more likely to find jobs and secure employment than those that are not. However, education is not a guarantee to a job. Employment and education are linked and having in demand qualifications means secure employment.

New technologies will make some occupations redundant. Automation, robotics and artificial intelligence will impact on existing jobs but many new jobs will be created using these technologies. The rise of new disruptive technologies will occur quickly and there's a shortage of people with the skills to manage and transition to new products and services.

Not all jobs will disappear. Just as not all jobs disappeared when computers were introduced. Today computers help people do a better job; so, automation and robotics will help you do a better job in the future.

Of the non-technology jobs, occupations such as Aged & Child Care, Education, Training, Sales, Construction & Trades, Business and Personal Services will grow. Those studying science, technology, engineering and mathematics (STEM) will find more jobs require this knowledge and expertise. Almost all jobs will require you to be digitally smart and expect you to know more than just the basics.

Not all jobs require a University degree so consider your options in vocational, apprenticeship and skills training. Most countries have a shortage of skilled labour so there is opportunity for employment.

6 Trends Shaping Our Future

Population

Population is getting older: Biotechnology, genome research and medical science technologies are helping people live better quality lives, curing many diseases.

Ai

Rise of smart machines and systems: Artificial Intelligence (AI) Robots, Autonomous Vehicles and Drones will create new jobs and new materials.

Devices

Smart Portable Devices with powerful processors: Computers will disappear and be replaced by mobile devices. This will require new media and communication tools, apps and data analytics.

Big Data

Business collects more data about us analysing what we buy, eat, wear, listen, watch, play, read and like.

Global Trade

Being able to buy and sell anywhere at any time has more people doing business internationally and purchasing online.

Internet

Connecting us to a network of physical devices, vehicles, home appliances and other items embedded with electronics, software, sensors, actuators, and network connectivity.

STEM

Get Ready To Have One Exciting Career If You Study STEM. There's a huge variety of awesome career paths open to you with a qualification in either **Science, Technology, Engineering or Maths** + STEM based skills are in demand in the job market.

Entertainment

From the design of video games, to special effects for films, to sound engineering for the music industry.

Health

From hospitals and healthcare professionals caring for patients, to inventing new high tech life-saving equipment to pharmaceutical companies researching new medicines.

Energy & Environment

From inventing new technologies to reduce carbon emissions, to developing new energy sources such as wind, waves and sun, to protecting rare species of animals.

Aerospace & Transport

From making travel easier for people whether on the roads, rail or in the air, through to helping goods be transported around the world for trade and humanitarian relief.

Construction

From architecture and design, to civil engineering of everything from bridges, railways and roads, to homes and parks and constructing buildings to planning towns.

Information & Technology

From the technology used in our mobile phones, to software designs which give us access to the internet, to managing international communications networks.

Sport & Fashion

From inventing new high performance sports equipment, to physiotherapy for athletes, from new textiles to computer aided design of new fashion ranges.

Food & Agriculture

From developing new high yielding plant varieties to feeding more people around the world, to cooking up new recipes for supermarkets, to farming the land.
