

COVID-19 OBSSR Research Tools

The table below lists and links to data collection instruments, including surveys, for assessing COVID-19-relevant Behavioral and Social Science (BSSR) domains for clinical or population research. The [NIH Office of Behavioral and Social Sciences Research \(OBSSR\)](#) has compiled this list, with assistance from the NIH Disaster Research program (DR2). DR2 is a collaborative effort by the National Institute of Environmental Health Sciences and the National Library of Medicine (NLM) that aims to improve our nation's capabilities for performing timely environmental health research in response to emerging threats and disasters. OBSSR has selected these instruments using the expertise of its staff and based on the high credibility of tool sources. However, NIH does not endorse any specific instrument as best practice for development, testing, or validation. Researchers are encouraged to test instruments (e.g., cognitive testing, pilot testing) before fielding them in their studies, to the extent possible in this rapidly evolving COVID-19 research landscape. For questions related to specific instruments, source contact information is provided (where available).

Additional research tools can be found by searching for various keywords of interest in the results of this targeted search for [COVID-19 research tools](#) in NLM's Disaster Lit[®] database.

The **Database ID Number** links to full descriptive information about each tool. **Instrument Name** links provide direct access to tools and surveys.

Database ID Number (full record)	Instrument Name (access to tool)	Question Areas Included in Instrument	Source Information
ID:22204	Obsession with COVID-19-Scale	<ul style="list-style-type: none"> • Obsession with Covid-19 	Christopher Newport University Dr. Sherman Lee sherman.lee@cnu.edu
ID:22203	Coronavirus Anxiety Scale	<ul style="list-style-type: none"> • Anxiety due to Covid19 	Christopher Newport University Dr. Sherman Lee sherman.lee@cnu.edu
ID:22198	Psychological Stress Associated with the COVID-19 Crisis	<ul style="list-style-type: none"> • COVID-19 related Lifestyle Change (work, sleep, school, testing positive, family, exercise) 	Stanford University Dr. Maheen Mausooof Adamson madamson@stanford.edu
