

Esborn Sikiah

My name is ESBORN ONDERI SIKIAH, and I am currently enrolled in the MASTER OF INFORMATION TECHNOLOGY (CYBER SECURITY) here at CHARLES DARWIN UNIVERSITY. I have an interest in the student council. I have enjoyed every minute of my time here, and I would like to add my experience in leadership that would benefit fellow students. I think leadership is service, and there is power in that giving; for that reason, I will make an excellent student leader because I have good ideas. I have been exposed to many leadership training skills and believe I am most qualified to be an efficient student council. I am a diligent team player and builder and can work well with others to effectively and efficiently meet new challenges. I am a dependable, hardworking, and committed person with a proven ability to work with less supervision and meet deadlines. If elected, I aim to foster transparency and equality, support the social system to advocate against discrimination, and support Gender balance. I support students' involvement in social activities; hence, I will pay specific attention to motivating students to balance "education and play, learning and leisure, obedience and freedom, safety and autonomy" to vision our institution with good relations among students and faculty members. I will ensure that the

efforts of students are adequately recognized and acknowledged. Also, I will organize cultural events where students can share and Create fun after-classes or trips.

I have previously held leadership positions, so I know how much responsibility comes with being Student Council. In my previous workstation as a high school teacher, I was involved in several leadership duties, including supervising students' activities, auditing school programs, chairing teacher meetings, and officiating student sports competitions. I also got involved in team building events; Red cross volunteer services, and Rotaract club associations, whereby I volunteered at a food bank and directly delivered to needy families, Visiting the elderly and giving them company (building homes for needy families, cleaning and painting their nails, read books, bring baked goods and make them birthday cards). I also participated in maintaining the environment by adopting a section of the highways and cleaning up roadside ditches, planting trees within the institution, Help in organizing blood drives for MP shah hospital and patients.

I ask for nothing but votes. I would be deeply honored if I will be given a chance to represent students.
