APPLIED PROJECT MANAGEMENT

A 3 day course developed by the Australian Institute of Management and facilitated by Charles Darwin University.

Providing a broad exploration of project management best practice, this course will give you an understanding of all aspects of the project management lifecycle. The course will utilise the associated text of Project Management in Practice, a comprehensive resource that is contextualised specifically for the Australian market and correlates to the Project Management Body of Knowledge(PMBOK®).

THIS COURSE IS RIGHT FOR YOU:

If you are already involved in workplace projects looking to undertake formal learning and/or qualification or if you have some experience in managing projects and are looking to transition to a Project Manager role.

YOUR EMPLOYER WILL BENEFIT BECAUSE:

You will gain practical insight into the ten key areas of project management that inform best practice and be able to successfully contribute to projects in your organisation.

LEARNING OUTCOMES:

- Define, develop and manage scope control processes
- Develop, implement and evaluate project schedules
- Plan for and implement processes to ensure quality project outcomes
- Determine project budgets and measure performance to manage expenditure
- Establish a team of suitably skilled project personnel and manage performance to achieve project objectives
- Plan, develop, implement and assess project communication processes
- Identify and address stakeholder needs through effective engagement practices
- Analyse and implement controls to manage risk
- Initiate and manage procurements activities and outcomes
