RISK MANAGEMENT

A 2 day course developed by the Australian Institute of Management and facilitated by Charles Darwin University.

Risk Management course will guide you in creating, implementing and evaluating a risk management strategy that supports your organisational objectives and ensures the minimisation of risk. You will become competent in identifying and managing risk while applying risk management processes and coordinating a risk management strategy.

THIS COURSE IS RIGHT FOR YOU:

This is an essential course any managers or professionals who are responsible for or involved in managing risk within their organisation.

YOUR EMPLOYER WILL BENEFIT BECAUSE:

You will have the enhanced knowledge and skills to deliver risk management to the organisation.

LEARNING OUTCOMES:

- Identify risks and apply established risk management processes in line with the responsibilities and obligations of your role
- Review and improve organisational processes, procedures and requirements for undertaking risk management
- Consult stakeholders in the identification of risks while using tools and techniques to assess them
- Coordinate risk management and support staff to manage risk and facilitate risk recovery
