## Keynotes

- **Professor Stephen Muecke:** Jury Chair of English Language and Literature in the School of Humanities at the University of Adelaide.
- **Perdita Phillips:** contemporary artist, independent researcher and founder and editor of Lethologica Press.

## The Roles of Arts, Social Values and Science in Mining

Mining in Australian land is a significant contributor to Australian culture and economy. Many different ores and minerals are mined throughout the country. Although mining booms have created social wealth and encouraged immigration, a number of mining practices have raised environmental issues and faced social contestation. The aim of this workshop is to provide an interdisciplinary forum to engage with key social and philosophical questions about the arts and sciences of mining

## Workshop Organisation Committee

Co-Directors: Lee Harrop, PhD candidate, Artist, Charles Darwin University, NT & Jana Norman, PhD Candidate, Adelaide Law School, University of Adelaide, SA
