

How to check & download Java Runtime Environment (JRE) version 8 for Mac Users - who do not already have Java installed

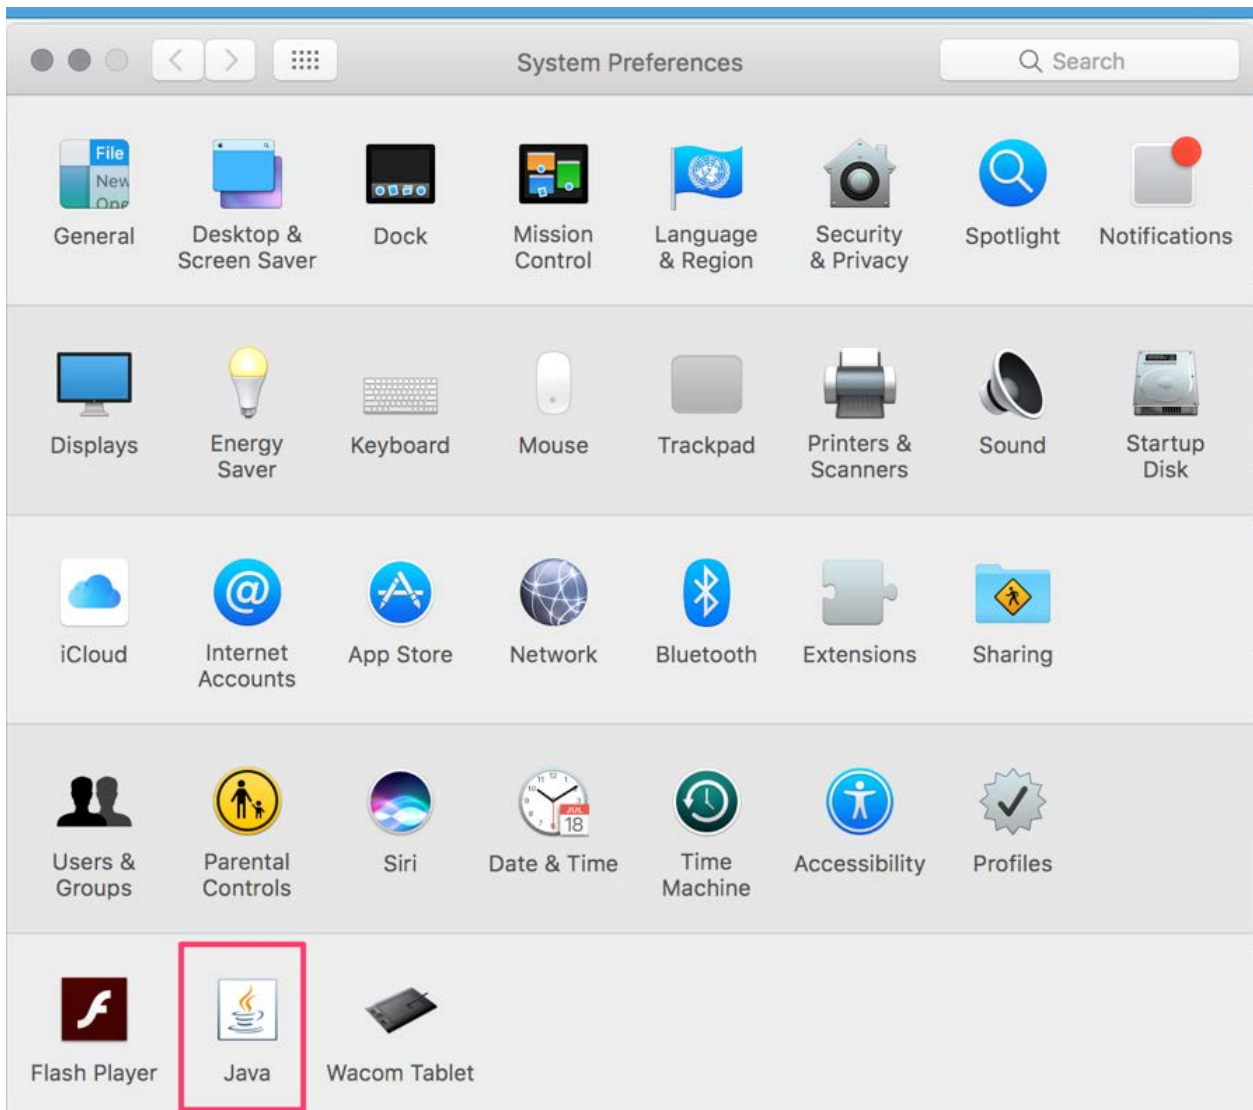

Java Runtime Environment (JRE) is required to be able to access the Callista system.

Check the computer has the compatible Java Runtime Environment (JRE) Version 8

Step 1: Click 'Search icon'

Step 2: Type 'System preferences'

Step 3: Click 'Java icon'

NB: If this 'Java icon' **does not** appear. Java is *not* installed on your computer.

Step 4: Download Java go to: www.java.com

Step 5: Click 'Free Java Download'

Step 6: Click 'Agree and Start Free Download' – Download Java version 8 only.

If further assistance is required, please contact ITMS on ext. 6600.

NB: As at 12/9/17 – ITMS advised Java version 9 will not work with the current version of Callista.
