

How to check & download JRE 8 for Windows Users with non-CDU computers who do not already have Java installed

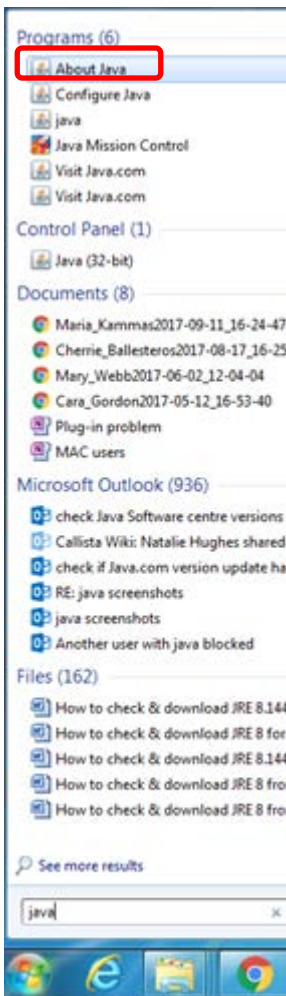

Java Runtime Environment (JRE) is required to be able to access the Callista system.

Check the computer has the compatible Java Runtime Environment (JRE) Version 8.

Step 1: Click the Start Menu

Step 2: Type 'Java' in the Search field

Step 3: Click 'About Java'

NB: If this 'Java icon' does not appear. Java is *not* installed on your computer.

Step 4: Download Java go to: www.java.com

Step 5: Click 'Free Java Download'

Step 6: Click 'Agree and Start Free Download'

Download Java version 8 only.

If further assistance is required, please contact ITMS on ext. 6600.

NB: As at 12/9/17 – ITMS advised Java version 9 *will not* work with the current version of Callista.
