

Mac: Firefox (Extended Release) & Java Web Start launcher

Callista Log in instructions

For Users who have the previous Extended Firefox release installed and wish to continue utilising this set-up.

As each person has different settings on their Mac to run different programs the below steps are a guide only.

Current Mac Callista Users may have used these instructions to access Callista prior to 4 December, 2017. This page has since been updated please review this page with your settings.

<https://wiki.cdu.edu.au/display/mac/How+to+Connect+to+Callista>

Please also check your Operating System and Java version guide required to run Callista
